Chapter 1 by Jack Frost

We all heard the story of the four titans of greece. But do we really know the real story? We know there was four giant titans that tried to destroy olympus and that they worked for Kronos, but what happened before all this happened?

Chapter 2 by R

You have to understand this, first. Once upon a time, the world belonged to the titans.

They came forth, born of the earth and the sky, and the world was there's and there's alone. They built up trees and animals and time and slowly around them shaped the world in to what we knew it now.

This is a tale of the Titans, a tale of Gaia who lived in the shadows of the world that she had created, who saw all the hurt that had come unto her children and who sought to hurt the sky.

Of all her children, one was brave enough, who loved her more than he loved his father. Who stood up and with a single act turned the fates and changed the path of time.

And oh, they gave him power, and power is an addictive thing. Power leads to the downfall of all.
